

Author Index to Volume 49 (1993)

(The issue number is given in front of the page numbers.)

- | | | | |
|---|---------|--|---------|
| Bavinck, H., G. Hooghiemstra and E. De Waard , An application of Gegenbauer polynomials in queueing theory | 1– 10 | Gotusso, L. , see Frontini, M. | 71– 78 |
| Belmehdi, S. , On Appell–Laguerre polynomials | 11– 17 | Guadalupe, J.J., M. Pérez, F.J. Ruiz and J.L. Varona , Endpoint weak boundedness of some polynomial expansions | 93–102 |
| Branquinho, A. , see Marcellán, F. | 153–160 | Guadalupe, R. , see Torrano, E. | 263–269 |
| Bultheel, A. , see Van Melkebeek, D. | 305–315 | Hooghiemstra, G. , see Bavinck, H. | 1– 10 |
| Bustamante, J. and G. López Lagomasino , Rate of convergence of Hermite–Padé approximants to a Nikishin-type system of analytic functions | 19– 25 | Ifantis, E.K. and P.D. Siafarikas , On the zeros of a class of polynomials including the generalized Bessel polynomials | 103–109 |
| De Bruin, M.G. , A tool for locating zeros of orthogonal polynomials in Sobolev inner product spaces | 27– 35 | Jaén, J.A. , see Llovet, J. | 145–152 |
| De Bruin, M.G., K.A. Driver and D.S. Lubinsky , Convergence of simultaneous Hermite–Padé approximants to the n -tuple of q -hypergeometric series $\{ {}_2\phi_0((A, \alpha_j), (1, 1); z) \}_{j=1}^n$ | 37– 43 | Koekoek, R. , The search for differential equations for certain sets of orthogonal polynomials | 111–119 |
| De Michele, L., M. Di Natale and D. Roux , Féjer kernels and noisy Fourier series | 45– 50 | Kwon, K.H. , see Evans, W.D. | 51– 57 |
| De Waard, E. , see Bavinck, H. | 1– 10 | Lapin, S.V. , Identification of time-varying nonlinear systems using Chebyshev polynomials | 121–126 |
| Di Natale, M. , see De Michele, L. | 45– 50 | Letessier, J. , On co-recursive associated Laguerre polynomials | 127–136 |
| Driver, K.A. , see De Bruin, M.G. | 37– 43 | Lewanowicz, S. , Results on the associated Jacobi and Gegenbauer polynomials | 137–143 |
| Evans, W.D., W.N. Everitt, K.H. Kwon and L.L. Littlejohn , Real orthogonalizing weights for Bessel polynomials | 51– 57 | Littlejohn, L.L. , see Evans, W.D. | 51– 57 |
| Everitt, W.N. , see Evans, W.D. | 51– 57 | Llovet, J., R. Martínez and J.A. Jaén , Linear recurring sequences for computing the resultant of multivariate polynomials | 145–152 |
| Förster, K.-J. , Inequalities for ultraspherical polynomials and application to quadrature | 59– 70 | López Lagomasino, G. , see Bustamante, J. | 19– 25 |
| Frontini, M. and L. Gotusso , A regularization method for discrete Fourier polynomials | 71– 78 | Lubinsky, D.S. , see De Bruin, M.G. | 37– 43 |
| Gilewicz, J. and A.P. Magnus , Inverse Stieltjes iterates and errors of Padé approximants in the whole complex plane | 79– 84 | Magnus, A.P. , see Gilewicz, J. | 79– 84 |
| Godoy, E. , see Zarzo, A. | 349–359 | Marcellán, F., A. Branquinho and J. Petronilho , On inverse problems for orthogonal polynomials, I | 153–160 |
| González-Pinto, S. , see González-Vera, P. | 85– 91 | Marcellán, F. and G. Sansigre , Orthogonal polynomials and cubic transformations | 161–168 |
| González-Vera, P., S. González-Pinto and J.C. Santos-León , A note on certain generalizations of the midpoint rule | 85– 91 | Martínez, R. , see Llovet, J. | 145–152 |
| | | Mason, J.C. , Chebyshev polynomials of the second, third and fourth kinds in approximation, indefinite integration, and integral transforms | 169–178 |
| | | Meijer, H.G. , On real and complex zeros of orthogonal polynomials in a discrete Sobolev space | 179–191 |

- Milovanović, G.V.**, On polynomials orthogonal on the semicircle and applications 193–199
- Moiseev, E.I.** and **A.P. Prudnikov**, On a complete orthonormal system of special functions 201–206
- Morandi Cecchi, M.** and **M. Redivo Zaglia**, Computing the coefficients of a recurrence formula for numerical integration by moments and modified moments 207–216
